## Professional Summary

Fresher Java Backend Developer with hands-on experience designing and shipping production-grade Spring Boot systems, including a secure e-commerce backend with JWT authentication, RESTful APIs, and an integrated Spring AI recommendation engine. Comfortable owning a project end-to-end schema design, security, deployment and quick to pick up new backend and cloud tooling. Seeking a fresher Java Backend Developer role to contribute to scalable, well-tested systems.

## Skills

**Languages & Frameworks:** Java 21, Spring Boot, Spring Security, Spring Data JPA, Spring AI, Hibernate, Kafka, Microservices, RESTful APIs

**Databases:** MySQL, DBMS

**Tools & Practices:** Git, GitHub, Maven, Postman, Docker, IntelliJ IDEA, SQL Workbench

**AI & Emerging Tech:** Spring AI, RAG, LLM Tool Calling, AI-driven Recommendation Systems

**Cloud & Infrastructure:** AWS (EC2, S3, IAM)

## Projects

### E-Commerce Backend with AI Assistant

[GitHub](#) ↗

Tools: Java, Spring Boot, Spring Security, Spring AI, JWT, JPA/Hibernate, MySQL, RESTful APIs

- Built a secure, scalable e-commerce backend managing users, products, carts, orders, and payments via a RESTful architecture, supporting 10,000+ users and orders with a MySQL/JPA-Hibernate schema built for data consistency.
- Implemented JWT-based authentication and role-based authorization across 20+ API endpoints using Spring Security, preventing unauthorized access and raising the security audit score by 20%.
- Engineered a cart-to-payment workflow that creates orders only after successful payment confirmation, improving transaction reliability and eliminating invalid order creation.
- Integrated an AI assistant using LLM tool calling to interpret user intent and dynamically trigger backend operations for product search, comparison, and recommendations.
- Built an AI-driven product recommendation engine based on category similarity and user input to surface personalized suggestions.

### Freelance Client Project — Poddarsales.in (Coffee Distributor)

[Live Site](#) ↗

Tools: HTML5, CSS3, JavaScript, Responsive Web Design, Netlify, GoDaddy DNS

- Independently designed, built, and deployed a production-ready responsive business website end-to-end, from requirement gathering through post-launch support.
- Delivered a responsive, cross-browser UI with structured navigation, product showcase sections, and a working contact form to improve customer engagement.
- Configured Netlify hosting and GoDaddy domain/DNS, publishing the site to a live custom domain.

### CloudDrive — Personal Cloud Storage Solution

[GitHub](#) ↗

Tools: Node.js, Express, MongoDB, JWT, HTML/CSS, JavaScript

- Developed a Google Drive-style file management web app handling 100,000+ files securely with Node.js, Express, and MongoDB.
- Built RESTful APIs for file upload, download, and deletion, cutting API response time by 40% through optimized Express.js endpoints.
- Applied JWT-based authentication and authorization, achieving 99.9% access control accuracy and preventing unauthorized access.
- Redesigned the MongoDB schema for user and file management, improving data retrieval speed by 30% while maintaining strong security protocols.

## Education

### Master of Science, Computer Science

Sept 2022 – Sept 2024

Pune Vidyarthi Griha's College of Science, Pune | CGPA: 7.78 / 10

### Bachelor of Science, Computer Science

June 2019 – Aug 2022

PDEA's Annasaheb Magar Mahavidyalaya, Hadapsar, Pune | CGPA: 7.88 / 10

## Certifications

- Backend Development Course — Physics Wallah (March 2024)
